Create New Drawings

After you start ZWCAD, an empty drawing file named *drawing 1.dwg* will be created. The following steps describe how to create a new drawing file:

- Click Application button » New.
- Click the New button on the Quick Access toolbar.
- Input NEW in the command line and press Enter.
- Press <Ctrl + N>.

The system variables FILEDIA and STARTUP control how a new drawing file is created.

- When you set FILEDIA to 0, the command line prompts will be displayed.
- When you set FILEDIA to 1 and STRATUP to 0, the Select Template File dialog box will be displayed.
- When you set both FILEDIA and STRATUP to 1, the New Drawing dialog box will be displayed.

Create a new drawing using default settings
